### DETAILED ACTION

This office action is in response to the amendment and remarks filed 9/26/05.

#### *Allowable Subject Matter*

1. Claims 1, 3, 5, 7 and 9 are allowed.

With respect to claims 1 and 4, applicant arguments presented *on page 5 the first and second paragraphs* of applicant's response are found persuasive because the prior art of record neither discloses nor makes obvious the combination set forth in the independent claims, and especially does not show a jet engine comprising: "a fan combined with the rotary shaft at the rear of a last rotor of the low-pressure turbine to rotate together with the rotary shaft in order to provide propulsive force in the exhaust gas, discharged through the low-pressure turbine from the burner, wherein the fan is substantially parallel to a tail portion of the last rotor of the low-pressure turbine at a head portion thereof and curved rearwardly at a tail portion thereof in order to change the lateral component of velocity of the exhaust gas, passing through the low-pressure turbine, to be directed in an axial direction to the utmost when rotating" in combination with the other claims limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
